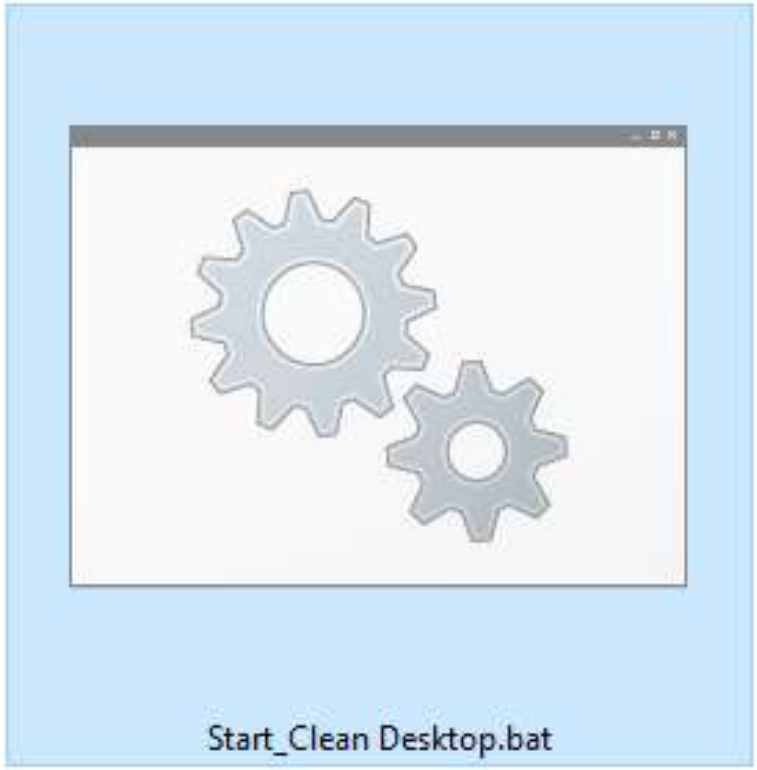
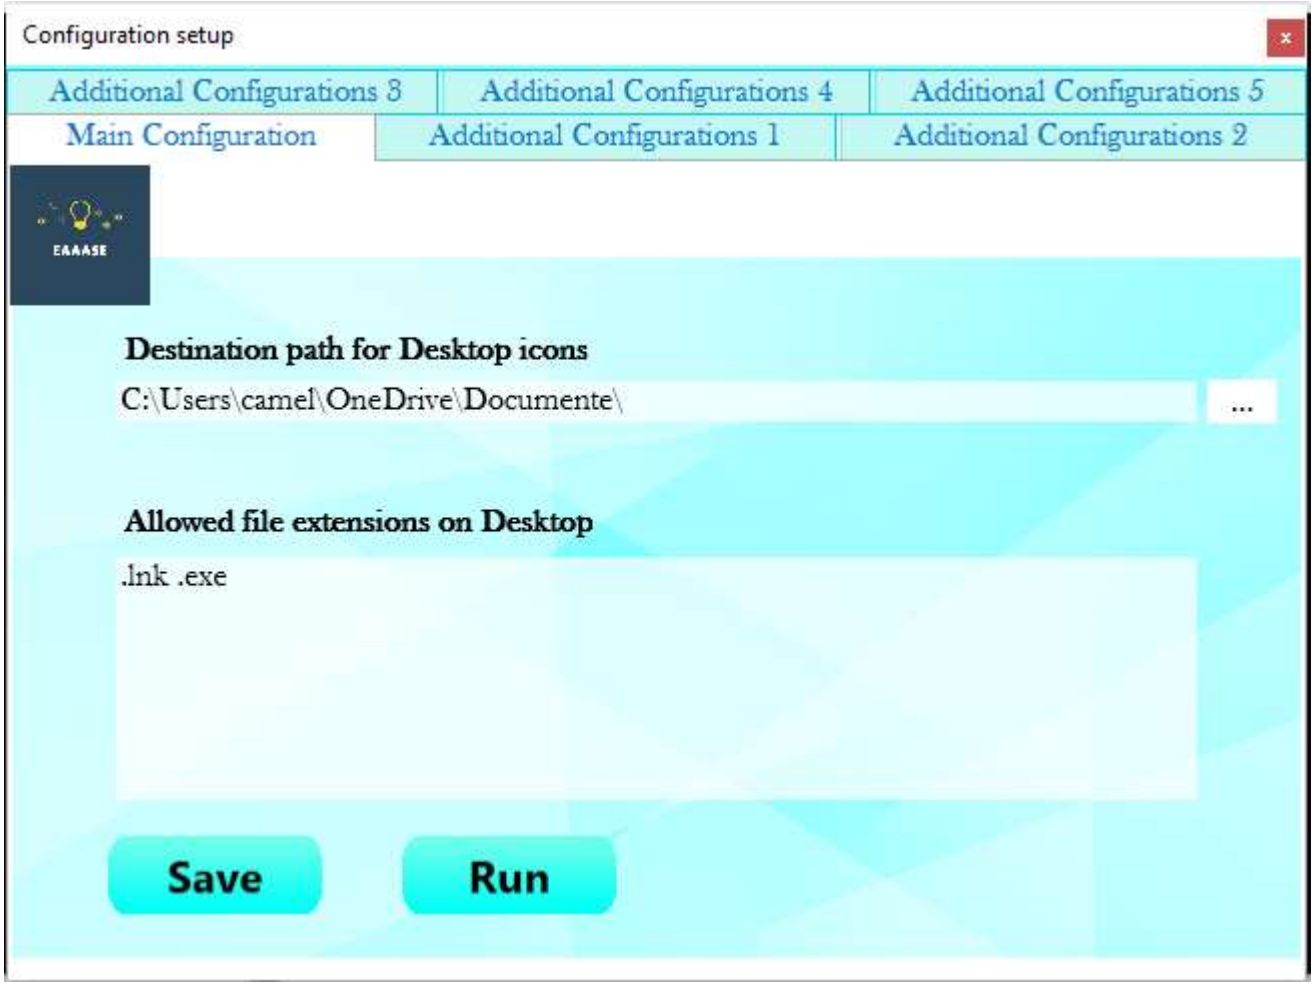
How to run Clean Desktop

1. Double-click on **Start_Clean Desktop.bat**.



EAAASE

2. In the **Main Configuration** tab, introduce the following data:



EAAASE

- **Destination path for Desktop icons**: click [...] and select the folder into which you want the script to move the files from the desktop.
- **Allowed file extensions on Desktop**: the list of the file extensions you want to stay on Desktop, separated by space. For example., **.exe .ps1 .lnk**. For shortcuts you can use **.lnk** and for directories **.dir**.

EAAASE

3. (Optional) In the **Additional Configurations 1-5** tabs, introduce the following data:

EAAASE

- **Additional destination path**: If you want the script to move some specific files into a different folder, click [...] and select the directory. Otherwise, leave this field empty. As an example, you could choose to have pictures or music moved into a separate directory.
- **Extensions of files that should be moved to this path**: Specify here what extensions should have the files, the script will move into the folder mentioned above. For example, **.doc .docx .ppt .pptx .xls .xlsx**. For shortcuts you can use **.lnk** and for directories **.dir**.

4. Click the **Save** button in any tab to save the configurations.

5. Click the **Run** button in any tab to run the script that moves the files from the desktop.
